Security technology has evolved, opening new possibilities to solve the challenges facing emergency responders and the communities that they serve. These challenges can often appear insurmountable because any emergency event is dynamic - changing moment to moment. Shifting security models have turned prior standards upside down – from reliance on expensive equipment to more affordable Machine-to-Machine (M2M) and IoT service platforms to keep you connected.

**EmergenZ™ Solutions** add another vital piece to gain more effective situational awareness. Emergency responders and security personnel can have access to real-time location data, 24/7 – anywhere, anytime!

#### Who we are

As pioneers in security solutions, each member of our executive team has over thirty years of experience delivering B2B mission-critical security and safety solutions. Mobile and wireless communications, telemetry, and GPS are among the technologies we have optimized for dynamic M2M environments. Our spirit of innovation continues to drive solutions that are open, interoperable, and connect organizations to the technologies that meet their need for critical security intelligence.

#### Our commitment

OSVH is committed to delivering real-time security solutions that enhance effective decision making during complex emergency and security events. Our goal is to **maximize the capabilities of IoT environments and connect technology, people and data**. Our open platform utilizes wireless communications, analytics, web-based data delivery, cutting-edge sensors, RFID technologies, GPS, and VMS.

#### What we offer

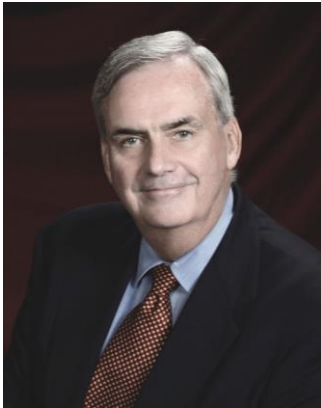

We provide a real-time monitoring infrastructure with a 24/7 cloud-based Software as a Service (SaaS) that delivers security solutions that is self-sustaining, interoperable with other systems, secure and portable. These facility-wide solutions are managed through a robust *Analysis Response Platform* that provides the critical business intelligence needed during emergency and other operational facility events. The result is an optimized interoperable, highly scalable environment that meets an organizations' need for critical security information - **real-time intelligence** required to manage and mitigate security events and secure valuable assets.

*EmergenZ Solutions deliver valuable real-time location data to emergency responders and security and facilities personnel to mitigate many risks associated with first stand emergency situations, evacuation events, perimeter security intrusions and tracking high value assets.*

## Our Executive Team

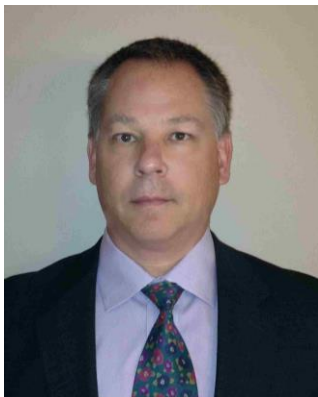

### William (Bill) Lenahan - Chief Executive Officer

Bill is a cofounder of OffSite Vision Holdings. With over thirty years in the information technology, telecommunications and wireless industries, he began his career at IBM and participated in IBM Product Review Boards assessing key product launches. Bill joined United Telecom, the forerunner of Sprint, where he formed Amerisource, a new venture that resold PBXs, PCs and systems integration products. He was the CEO of Sears Business Centers, Bell South (Cingular Wireless), and KMC Telecom, the largest privately held national telecommunications company serving over 300 markets across the country. Under his leadership, BellSouth earned recognition as the nationwide leader in wireless data. Throughout his executive career, Bill has directed and managed market introductions of breakthrough technologies and was instrumental in developing, funding and designing the RIM Blackberry and Palm.net Services.

### Mark Eklund - President

Mark is a cofounder of OffSite Vision Holdings. Since the early 1980's he consistently delivered advanced security solutions by integrating best of breed Machine-to-Machine (M2M), telemetry, wireless and GPS for mobile communications and tracking of assets and personnel. Mark was responsible for the first major deployment of laptops in police cruisers for the State of Connecticut and a tracking and routing application for over 10,000 vehicles at ComEd in the State of Illinois. He was founder and president of Fleet Analytics, a real-time GPS Tracking Service Company and established partnerships with leading wireless device manufacturers and Globalstar Simplex Services. Mark held executive positions in multiple wireless and communications companies including Data on Air, Hartsdale Technologies and Mobile Office Solutions Technology. Mark currently serves as Chairman of the Long Island Chapter of ASIS International, a global association with more than 35,000 security members worldwide.

### Douglas Leu – Chief Technology Officer

Doug has over 30 years of software engineering experience including lead development and deployment of four generations of asset tracking solutions. Prior to joining Offsite Vision Holdings, he was responsible for architecting and managing the software development of the Synovia Solutions' Silverlining SAAS product that currently supports over 65K vehicles for more than 500 customers and processes over 45M events each day. Doug also designed and implemented mission-critical, wireline and wireless applications for companies including Kraft Foods, P.C. Richard & Sons, Ferry Morse Seed Company, Tozour Energy Systems and Lockheed Martin. He earned a BS in Computer Science from the University of Dayton and MS in Engineering Management from Santa Clara University.

*Real-time Security & Safety  
Solutions that solve the challenge of  
“seeing what can't be seen!”*
